Let's continue our activities!

Dear all,

despite the health emergency due to COVID-19, the activities at our experimental fields at the didactic-experimental farm ‘Pasquale Rosati’ – Università Politecnica delle Marche (central Italy).went on and in July the first flower heads from our cultivated thistles have been harvested! Now, we are ready for the characterization of the milk-coagulating activity of the aqueous extracts prepared from theses flowers and (hopefully!) the incoming cheese-making trials to produce thistle-curdled Mediterranean cheeses!
